第 1 問 次の英文を読んで、後の問い（問 1～問 8）に答えなさい。（配点 50 点）

A new study has found that \*elephant seals have to work very hard to stay fat.

(i)The research represents the most (a)complete study \*to date of the feeding ( 1 ) of northern elephant seals. Scientists paid special attention to females of the species during difficult two-month trips, or \*migrations, in the northeastern Pacific Ocean.

The seals were ( 2 ) to spend up to 20 hours every day - and sometimes a full 24 hours - in continuous deep-diving to feed on fish. They fed 1,000 to 2,000 times daily to gain the body fat necessary for \*reproduction and warmth in the cold waters.

Taiki Adachi of the University of St Andrews in Scotland led the study, ( 3 ) recently (b)appeared in the journal *Science Advances*.

“It is not easy to get fat,” Adachi said.

Researchers studied 48 female elephant seals from Año Nuevo State Park in California as they traveled large ocean distances. Their entire trip was around 6,000 kilometers.

Scientists (P)[①their findings ②in ③based ④data collected ⑤on] 2011 and 2018. (X)They used three small removable devices.

One device, attached under the \*jaw, (c)counted the number of times the seals fed and measured their depth. A second satellite-linked device, attached to the head, followed the seals’ ocean movements. (ii)The third device was a “smart” video camera with an \*infra-red LED light and another depth sensor. It was also attached to the head.

Elephant seals get their name from the large noses of the males. These noses look ( 4 ) an elephant’s \*trunk. There are two species - the northern elephant seal and the slightly larger southern elephant seal. The two are the world’s biggest seals and the largest ocean mammals ( 5 ) than whales.

Male northern elephant seals can grow up to 4 meters long and weigh up to 2,000 kilograms. Females are smaller, getting up to about 3 meters in length and 590 kilograms. The males feed only in coastal waters.

Some large marine mammals depend on deep dives to get enough food to support their large bodies. \*Sperm whales, for example, hunt for large prey like \*giant squid.

Female elephant seals -- which are large, but not as big as sperm whales -- have a different solution. They eat huge amounts of small fish. But it is difficult for (Y)them to catch enough small fish to meet the energy needs of their large bodies.

Adachi said about the female elephant seals:

“They (d)continuously dive, for long periods of time - 20 minutes on average and about 100 minutes at maximum - and deep - 500 meters on average and about 1,500 meters at maximum - with only a few minutes breathing at the surface.”

Adachi noted that the seals do not come back to land for their two-month trip, or migration. “The sleeping hours in at-sea animals is not fully understood. But, based on our record of extreme foraging, their available (Q)[①sleeping ②be ③should ④for ⑤time] less than 20 percent of the day,” he added.

Foraging is a (e)term that means looking for food.

Northern elephant seals live on the Pacific coast of the United States, Canada and Mexico. They generally give birth in California and Baja California, usually on \*offshore islands, from December to March. During their \*mating season, they do not eat. During this period they lose about a third of their body weight.

第2問 次の英会話文の空所 ( 1 ) ~ ( 5 ) に入れるものとして最も適当なものを、  
後の①~④の中から一つずつ選びなさい。(E=Emma, J=Jiro)

(配点 30 点 (各 6 点))

E : I know tomorrow is Friday, but could you come home early?

J : Okay, but why?

E : Because your parents are planning to come to our house on Saturday, I need your help cleaning up.

J : Oh, actually, my father called me today and said they can't come after all. ( 1 )

E : That's too bad. Is she all right?

J : Yes, she has a runny nose, but she'll get better soon. So, now that we have no plans, what shall we do on Saturday?

E : ( 2 ) Right now, there is a special exhibition of Mexican paintings.

J : Sorry, but I don't really want to go there. That exhibition doesn't sound very interesting to me.

E : Okay, no problem. What do you want to do instead?

J : I don't think we've been getting enough exercise lately. So, how about doing something active for our health?

E : Sure. Maybe we can play tennis in the park.

J : ( 3 )

E : Well, in that case, let's go bowling.

J : Sounds good. It's been a long time since I last went bowling.

E : Me, too. You're good at bowling, aren't you?

J : Not that good, but I like it. I used to be in the bowling club when I was in school.

E : ( 4 )

J : My club used to go to a nice bowling alley in Shinjuku.

E : Then, let's go to that bowling alley on Saturday and go out for dinner afterward. What restaurant should we go to?

J : ( 5 ) There is a nice Japanese restaurant near the bowling alley.

E : That sounds great. I also want to have Japanese food.

J : Perfect. But let's try not to eat too much. We've both been gaining weight lately!
